John F Kennedy was assassinated November 22nd 1963 it is still a subject of controversy Gary Shaw author of the book cover-up examines the evidence concerning the John Kennedy assassination tonight on alternative views for the Kennedy assassination buffs out there we're going to replay our interview with the assassination theorist Gary Shaw that we take two years ago we also are going to play the Zapruder film that actually recorded the Kennedy assassination and we provide an analysis of that and an update on more recent assassination theorist theories concerning JFK's assassination but first we'll have some updated news stories I have something from The Village Voice one of my favorite writers editorial writers today Pete Hamill and he he gets

[00:02:01 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=121s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=121s)

writers today Pete Hamill and he he gets cranked up about the NRA's recent move to push of a new bill through Congress lessening controls on guns OS the National Rifle Association Rifle Association they were they recently succeeded in doing just that and this despite the opposition of virtually every Police Department and this includes things like buying and selling guns across state lines in this new plastic gun which supposedly can escape detection in airport terminals so it's called a terrorist special or a hijacker helper this is another term I've heard recently and Pete Hamill gets all worked up like he usually does which is why I like him and he comes out with some great statistics though these aren't new but they're very interesting in 1980 according to handgun control incorporated 77 people were killed by handguns in Japan which has about half of our population eight died in Great Britain 24 in Switzerland eight in Canada 23 in Israel 18 in Sweden and four in Australia in the United States eleven thousand five hundred and twenty-two Wow it's another thing I heard just a couple years ago is there there are more murders in Houston every year than there are in all of Western Europe and now we have the NR 8 pushing for less stringent controls well as Hamill says the international association of police chiefs and 13 other organizations for the police lobbied hard against this so-called Volcker Vollmer NRA bill weakening the gun laws but they simply didn't have the bribe money to the NRA has at its disposal the NRA admits to spending a million and a half on its ad campaign supporting this bill and last year alone the NRA laid out 1.4 million dollars in campaign contributions to our as he says incorruptible congressman and as he says also Greece works I saw the coverage of this bill some of

[00:04:01 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=241s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=241s)

I saw the coverage of this bill some of the debates on it in Congress on a c-span and it was unbelievable what the NRA and the Volkman bill wanted to allow for instance you didn't have to do hardly any registering for handguns or other weapons Plus that made it legal to have silencers on your gun without having to register them and also would allow something now forbidden which is a home silencer kit to be built so that you could build your own silencer I don't know what else silencer would be good for except for assassinations plus it made it illegal to do customizing work on your guns like to build sawed-off shotguns and any other number of innovations that you could use for violent crimes some of the words they wanted to do away with all regulation whatsoever of guns in the last few minutes some amendments came on that stops them in the most outrageous of these changes that the NRA and the voc 'mobile wanted to put through that still just about anything goes to the police chiefs called this the professional crime bill because they were the chief beneficiaries of this new gun bill yeah but somebody's got to kill them commies making a lot of headlines around the country has been the activity of Lyndon LaRouche and his candidates we were sprinkled around the country and particularly after they got their notable success up in Chicago but it hadn't been mentioned about the what the Christian right wing people are doing to the GOP around the country particularly as Ronald Reagan's presidency is fading and he isn't going to be around for another for another term well these fundamentalist Christians are organized and they're trying to take away some of these positions which the regular GOP folks have been holding all this time and it's beginning to worry they the

[00:06:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=360s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=360s)

and it's beginning to worry they the regular GOP stalwarts the right wing has its own particular agenda the far right and they're very disappointed because Reagan hasn't been following this and the people like the doles of the party and the clown who's the Vice President what's-his-name I never remember his George Bush George Bush that's right anyway they don't like him and so they're starting to run their candidates all around the country and they've got a lot of money too the state GOP establishment charges in various places the rise of the Religious Right is alienating potential adherents I might also note that Pat Robertson of the Christian Broadcasting Network has been getting a lot of publicity in his run for president so he's going to go after someone like Bush from the right and maybe even run as an independent and siphon votes off from the Republican candidate so after seeing the left and the Democrats tear themselves apart over the last 10 or 15 years we may have a similar spectacle emerging on the right now let's go back to 1981 and the program we did on the Kennedy assassination here is an article which if you ever get a chance to read a back issue of The Rolling Stones this is May 20th 1976 the title which the Hughes Nixon Lansky connection the secret alliances of the CIA from World War two to Watergate it's a mind-blowing article about 20 pages long but it shows the interrelationships continuous in relationships with a CIA the Mafia and the United States government specifically presidents and also the State Department it shows the CIA involved very heavily in the United States domestic politics it shows them contributing to campaigns as Showzen feeding information to favored politicians shows them laundering money

[00:08:02 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=482s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=482s)

politicians shows them laundering money for politicians it also shows the relationships with Howard Hughes the Mafia the CIA once again the Defense Department and presidents for instance shows that Nixon was very heavily involved with the mafia and shows him starting back in World War two when Roosevelt got mafia started involved with relationships with the CIA and Thomas E Dewey the same way he was prosecuting the Mafia on one hand and he was helping them out on the other you see the manipulation of the press by the CIA and people all during this period keep popping up again and again people with the in the Bay of Pigs situation the Kennedy assassination they plumbers in Watergate all popping up again and again and this article would from the 76 issue 2076 of Rolling Stone gives people a good background to understand the Kennedy assassination you have some updated theories on it well there's been two books published in recent years that give new theories of what happened in the Kennedy assassination one is that the mob in conjunction with the FBI and the CIA assassinated Kennedy according to this book the mob had blackmail information on Kennedy on one of his love affairs with some mob woman they had tape recordings and pictures on so they used this to try to blackmail Kennedy to try to keep him from coming down on Mada activities however Robert Kennedy was Attorney General was out to get the mob and harder than any previous Attorney General persecuted where came after the mob and an angry mob therefore decided that they had to get rid of Kennedy so that was one conspiracy theory another is not really a conspiracy theory but it analyzes what happened to Kennedy's body from the time it left

[00:10:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=600s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=600s)

Kennedy's body from the time it left Dallas to the time it came to Washington and showed that some bizarre events went on first of all there's the empty coffin theory that the coffin that was supposed to have claimed contained Kennedy's a body that people saw go on the airplane in what in Dallas turned out to be empty when it was open in Washington which suggests that Kennedy's body was removed for some sort of surgery or cosmetic operation from the time it came to Washington to the time it was finally he was finally buried and before it was also inspected for the the post-mortem analysis that was the basis of the one bullet theory well according to this analysis the body was made up to show that there were not more bullet wounds but rather that it was used to support the one bullet theory well Doug let's take a look at these approver films which actually show Kennedy being hit and show these wounds and show him being wounded why more than one bullet apparently and also coming from the front right as well as from the rear the following film footage was compiled by Robert Groden run Don critic of the Warren Commission report this shows the Kennedy limousine is just going down Main Street in Dallas now the presidential car is making a turn onto Houston

Street the president is seated in the rear of the car on the right governor Connally is sitting directly in front of the President the limousine will be making a turn onto Elm Street shortly this is the famous Abraham Zapruder film of the Kennedy assassination as the president's limousine emerges

00:12:00 (https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=720s)

as the president's limousine emerges from behind the sign it's obvious he has been struck by a bullet he slumps forward and in the fatal head shot now here is blow-ups of just the president in the soup Reuter film again as he passes the sign he's obviously been hit in the fatal head shot the president's reaction to the head shot can be seen more clearly with these enlargements notice that as the president is struck by the fatal head shot his body is driven violently backwards now let's delve more deeply into the Kennedy assassination with our 1979 interview with author Gary Shaw very honored and privileged to have a man who has devoted the last 15 years to the research of the Kennedy assassination mr. Gary Shaw he's also the author of the book cover-up he provides a lot of photographs and endale and in-depth excuse me detailed analysis of the Kennedy assassination and without too much further ado I'd like to turn it over to Gary thank you very much well it's a privilege for me to be here as most of you know presently in the halls of Congress there's a new investigation into the death of President John Kennedy a murder that occurred 15 years ago this month a murder I think that affected all of our lives in one way or another and one that there's still many many questions about it's a murder and a death that will not go away and so I've devoted a lot of my time into my own investigation into the death of the president simply because when the warren report was issued in 1964 I began to have questions and doubts about their conclusions and began to compile information talk to witnesses accumulate

00:14:04 (https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=844s)

information talk to witnesses accumulate photographs and things of this nature and soon discovered that when especially when the 26 volumes of allegedly supporting evidence to the war on reports conclusions was issued that the only trouble with the warren report was that they forgot to underline where they lied to us about the president's death one of the things that's recently come out and I think it's very important to know the attitude of the investigation of those 15 years ago as a memorandum this memorandum is from the ninety thousand page FBI release which came out about last spring this is a memorandum dated three days after the president was dead November 25th 1963 it was to mr. Moyers the new president John King Lyndon Johnson's chief aide it's from mr. katzenback the Deputy Attorney General and I'll read it verbatim it begins it is important that all of the facts surrounding President Kennedy's assassination be made public in a way that will satisfy people in the United States and abroad that all the facts have been told and that a statement to this effect be made now the public must be satisfied that Oswald was the assassin that he did not have Confederates who are still at large and that the evidence was such that he would have been convicted at a trial speculation about Oswald's motivation ought to be cut off so there is a cover-up from the very beginning the very beginning they had determined that Oswald was the assassin the lone assassin he had no Confederates and that any speculation otherwise should be cut off immediate what was the date of the memorandum again during November 25 1963 three days after the president died so they had a conclusion three days afterwards that's correct Hawaii's supposed well of course you're

00:16:03 (https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=963s)

Hawaii's supposed well of course you're getting you're getting me to speculate which I don't mind doing it the one of the chapters in the book is called speculation who killed Kennedy and it's my contention that the people responsible for the president's death are a government in itself within these United States of America and that they're still in power they liked what they got in 1963 they're determined to keep it and if necessary they'll kill again and again and again which they have done which they have done you have some well that new film let's talk about that okay something it just came out just the past few days and you say you have actually seen it yes suppress film to give the people a little in depth on on the new film that's been much publicized beginning this past Sunday a copyrighted story in the dallas morning news of last sunday talked

about a man named Charles Bronson who had been in Dealey Plaza on the day of the assassination and took a very important piece of movie film as well as some steel slides this information had been classified about this film until this year and so when this came into the hands of a private researcher in the north northern area it was sent down to one of us in this area and it was turned over then to Earl goes the reporter very fine investigative reporter for the Dallas Morning News who in turn traced Mr. Bronson down he had since retired from his employment of that time and viewed for the first time the film the importance of the film and the slide is really twofold the film itself actually photographs the president while he's under fire from an opposite opposite position to the famous as a pruder position so you get a little

[00:18:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1080s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1080s)

as a pruder position so you get a little bit different perspective of that looks on the other side of the street that's right so the bullets were coming from the grassy knoll over Zapruder's head right but they were actually going to ward this General Mr. Bronson okay now he was a distance away but about five minutes prior to the arrival of the president in Dealey Plaza he and his camera on to an ambulance who had arrived in the Dealey Plaza area to pick up an epileptic who had had a seizure right there on the corner five minutes before the motorcade we've always speculated that it was this was a diversion because the man got out of the ambulance at Parkland Hospital and walked away without any treatment but anyway he filmed this ambulance fortunately he had his lens on wide-angle and was able to photograph the sixth floor windows of the Texas School Book Depository shall we laughing that yes okay let me get over to this this is not a hammer Bronson's no film it's a yes does show the the photograph of the depository actually this was about thirty seconds after the shots so it's a very pertinent photograph the dot was also classified until about 12 years ago this was taken by an army intelligence agent who happened to be in Dealey Plaza taking pictures okay which is the building this is the alleged sniper's nest or where Oswald was supposedly fired the hills did kill the president it's in this window that Mr. Bronson's film catches a man in a red shirt you can see moving back and forth in front of this window Oswald was not in a red shirt that's correct next to that and this group of windows and that by the way the entire sixth floor of the Texas School Book Depository was aware room there were no partitions and so in this window a person can be seen or an object you know in other words their simultaneous movement in this window and this window and in the in the Bronson film there is even the possibility of a third movement

[00:20:02 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1202s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1202s)

even the possibility of a third movement in one of the windows so but but basically definitely there are two movements here at the same time and this definitely supports the theory that Oswald was a patsy and possibly they were afraid he might chicken out at the last minute and so they went up there with him or something to that effect possibly well definitely it proves that that there were two men on the sixth floor at the time of the shots well there's not whether either one of them were Oswald is a question mark because we now have an eyewitness who told the FBI that day that she saw Oswald at 12:25 and five minutes before the assassination in the lunchroom and they didn't give that information they didn't even print it and did not give it to the Warren Commission because how can a man be in the lunchroom at 12:25 the president is shot at 12:30 and at 12.5 there's already one man in the window and one man in the next window and then when Officer Baker and Roy truly the supervisor of the Texas depository race into the School Book Depository after the shots were fired within two minutes they find us in the lunchroom and our speculation is he never left the lunchroom he was there all the time and that's where he said he was there's something I've noticed from those those photographs Gary and that's that they're north lot of open windows and that building is that significant I think it is especially in this southeast corner are actually the southwest corner window these these two windows are fully open one of the eyewitnesses in Dealey Plaza said that there were two men seen in this window down here one of them with a rifle and I believe that one of the shots was fired from this particular window here now we have three eyewitnesses plus the movie film that says that two men were on the sixth floor of the skeleton School Book Depository this could possibly be the shot that hit him in the throat I believe it's the shot that hit him in the back coming back right that came out is through well there are some indications that the bullet could not

[00:22:02 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1322s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1322s)

indications that the bullet could not have been fired from even up in this depository window because it was that a because the entrance of the wound and all the path of the wound and Kennedy was at such an angle where it could not have been shot and that's occurring oh there's so water speculates that reason that I speculated that there was a shot fired from that window but it was strictly for diversion and evidentiary purposes only it was a planned shot to call attention it was the first shot it struck absolutely nothing he was fired simply to call attention to that window and even a last shot was fired from there and the eyewitness said the man lingered at the window as if to admire his handiwork I believe he wanted to be seen in that window this was shown by the new movie the no not not the man lingering and all I'm saying this was prior I hope I'm not jumping the gun but don't you have a picture of the wound produced in Kennedy right well this is Commission exhibit number 388 that the Warren Commission published in their in their book and shows the president it's an artist conception by the way the artist never saw the president's body nor did he see any photographs of the presidents these were described to him and they do not anywhere near match the description given by the Parkland Hospital doctors and attendants that day this is absolutely incredible but they bet the president's headed contrary to what the film show the the president is erect at the time of the shooting contractor what that shows they bent the president over in this position distortedly to show the angle of the shot so that it would come from the sixth floor Texas School Book Depository one other thing I'd like to point out about mr. Bronson he not only had a movie camera but he had a very fine slide camera our our steel camera and he took a very important slide he said he his finger depressed the button on his slide camera

[00:24:01 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1441s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1441s)

depressed the button on his slide camera at the exact moment of the shot and so at that time we have a very good perspective thing from the opposite view to the produce of the first shots do we have you have a copy of that copy of that but in that and and this is the FBI memorandum about Bronson I got this under freedom of information so this is the November 25th 1963 describes Bronson's film where they say it's not a value but they also said one of the thirty five-millimeter color slides depicted a female wearing a brown coat taking pictures from an angle which would have undoubtedly included the Texas School Book Depository building in the background of her pictures her pictures evidently were taken just as the president was shot approximately five other individuals in the photo were taking pictures at that time this I think is important because the FBI has denied to me under freedom of information that they have this film in their possession and yet in this slide you can see this is right after the shots were fired there people already lying down and and and moving away but here is the lady in the brown coat that they're talking about she's got her camera and the Zapruder film you can actually see her and she pans the the entire Sassa nation scene shortly after that this photographer caught her on the opposite side of Velen street on camera is and yeah and this lady we look for we knew about it for quite a few years but we look for and I stumbled owner in 1970 an interview der for the first time and got the story of her movie she took the movie all during the assassination she was a camera bug she was 18 years old at the time she took the movie at that time was

[00:26:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1560s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1560s)

she took the movie at that time was working right next door coincidentally to Jack Ruby's colony club she took her film back to the to the her place of employment and the next day before she had even developed it two men who identified themselves to her as either Secret Service our FBI agents said we understand that you took a film of the president's assassination and she said that she did they said we'd like to to have it and she said I'm not developed it yet she said and they said well we'll develop it for you make copies and return the original to you so they took her film she's not seen the film since that day I filed under Freedom of Information with the Secret Service with the FBI and with the CIA all of them denied existence of this particular film yet the FBI admits that they knew over in November 25th 1963 did you file with the mafia mafia that's the only one well my speculation is is that there were individuals in the Dealey Plaza area using fake Secret Service credentials this is a proven fact and it would not surprise me at all if she went back next door

to Ruby's club where she communicated and were friends with Jack Ruby's employees and was bragging about having taken a film of the assassination the word got around and so we have two more fake Secret Service or FBI agents who come and confiscate them and it's never been seen or it was possibly confiscated by the FBI and it like the Bronson film other photographs that I can tell you about if we had the time have been classified and kept away from the American people for all these years what about this new committee in Congress is that going to be another whitewash cover-up kind of looks that way unfortunately it appears that that it will be another whitewash

[00:28:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1680s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1680s)

that that it will be another whitewash they're using basically the same tainted evidence that that the Warren Commission used to come up with their conclusions including the same tainted witnesses at the same tiny witnesses that's the same investigatory techniques where they're asking the FBI and the CIA and the Secret Service about what they did and I doubt very seriously that the FBI is going to tell the truth that they made an error well they haven't yet they destroyed evidence they've doctored evidence they they put in a couple of frames of the Sapru der film backwards so it would look like he was shot from the back instead of from the front well I tell you now there was just one minute many many things we found out recently about another set of photographs taken by a man by the name of Robert Croft he was standing in a in a position directly across from the School Book Depository do you have a you have a picture of the whole set up from the air do you know yes I do maybe we could put that on the screen and so that everybody would be able to orient themselves okay let me see if I can get that okay that's the an aerial view of Dealey Plaza okay and then the route was what the route came down this street right here excuse me this street which is Main Street yeah and made a right-hand turn going due north the School Book Depository is here so the motorcade was going to recognize it then it made a hundred and twenty degree angle turn now this turn is very strategic this made this an ideal assassination setup because the court car had to slow to a very slow rate of speed as it made this 120 degree angle turn that was a gun Secret Service regulations regulations by having open windows in the building nearby is also against Secret Service regulations hearings but mr. Croft was standing at this position right here directly across from the School Book Depository mr. Zapruder was was here by the way mr. Bronson was right here oh he was quite some distance all right well about a half a block is off yeah but anyway mr. Croft took four

[00:30:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1800s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1800s)

off yeah but anyway mr. Croft took four photographs he took one from this position and then ran to this position and took one as the presidential motorcade came around the corner and then he said I took one exactly at the time of the shots the first shot was fired so here's another one it would have been taken looking at the grassy knoll which is which is this area right in here okay okay unfortunately the FBI got his spam and developed and developed it themselves and out of a 32 roll film he took four shots of the assassination are the the motorcade three of them turned out perfect the one taken at the time of the shots after the FBI got through with it came out blank and that was the only bearing the whole roll the only one on the whole road that came out black would what would you speculate is the FBI's role in this some people are kind of torn between whether they're actually involved in this in an overt fashion or whether or not they're just simply a bunch of bunglers what's your personal opinion Gary well my personal opinion is that there are some people in the FBI who were not bumblerers that it was a pre-planned need-to-know basis and that they participated in the cover-up this applies banks it applies to the Secret Service as well yesterday I noticed that Fletcher Prouty has also made similar accusations over the last few years of course we used to all think he was nuts but a lot of the things that he said is personal so I want to come on stress you know we need the FBI and we need the Secret Service and we need the CIA what we don't need is a few in these organizations who think they know best how to run this country cos the minute that they've used mafia hitmen for a number of years like particularly in the 50s they try to use mafia hitmen to get Castro in Cuba so it's not implausible that they helped out with members of the Lansky traffic Conti gang Salvatore Jia Connie John Roselli by the way the last two which have been mmm they've died recently under rather mysterious circumstances

[00:32:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1920s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=1920s)

under rather mysterious circumstances would you care to comment though on some of the accusations about the involvement of the Mafia with Dallas police that's very interesting because in a recent article in Dallas Times News Dallas Morning News just kind of a throw off sentence the author said it's been well known for years that the Dallas Police has been infiltrated by the mafia well I think probably they are corrupt policemen you know in the Dallas Police as well as in the Sheriff's Department at that time more than likely still are there was a mafia connection to Dealey Plaza and a lot of people are not aware of this a man by the name of Jim Braden was arrested a few minutes after the assassination under Smith Styria circumstances excuse me that's the same Jim Braden who is a charter member of lacasa Country Club and had no visible means of support and had a private chat and a few other well if that at that time he wasn't quite that well alright at that time he was a home parole he was in Dallas he said allegedly on all business one thing he had done about two months prior to the assassination he had changed his name and it became Jim Brady his real name was Hale Eugene Brady and he changed it only in September of 1963 prior to coming to Dallas on the oil connection you mentioned it means should be noted that it has been documented through records that this Braden did meet with members of the Hunt Oil Company group in particular I think either Nelson bunker or Lamar Hunt even though they initially denied it that they knew him his secretary had kept a record of Braden's visit to one of hunting brothers that's right he in fact met with with at the hunt offices on November 21st 1963 because if there was this day that Jack Ruby also went to the hunt offices / for some mystery this is mr. Braden here and I'm sorry I don't have a good clear say that we can

[00:34:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2040s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2040s)

don't have a good clear say that we can get it over here you mean Jack Ruby meant with Braden was Jack Ruby was at the same place with Braden in the Hunt Brothers offices that's correct and Braden state at the Cabana Hotel it's now changed its name but that was a hotel in Dallas that was built with teamster funds and on november 21st 1963 that night jack ruby also goes to the Cabana now I can't say that he met with Jim Braden but it's strange that Jim Braden was arrested in Dealey Plaza gave false identification had an FBI rap sheet of arrest four pages long and yet was immediately released by the by the Dallas authorities and only because he had to sign an affidavit of what he was doing there did we know about him and it took years to trace him down but that's a mafia connection as well as a connection to the labor Jimmy Hoffa because of the he later on became a charter member of the caustic Country Club in Southern California it's a two thousand acre spa and it was financed by Hafez teamster funds and Central States teachers right and so it's just one of the strange arrests they were actually about 13 or 14 arrests made that day in connection with this all of them very strange for instance the arrests behind the defense area above the grassy knoll of three men allegedly tramps were told the the played part about these three men they were marched in from the School Book Depository they were hiding in boxcars taken into custody that by the way the Dallas County Jail the Sheriff's Department is directly across the street from Dealey Plaza so they didn't have far to go one of the things missing from the National Archives is the arrest records for November 22nd 1963 so we don't know who these men are we have their photographs and there's been ten affinity for Denethor case over the years and maybe we'll have more light on it in the days and weeks ahead well you have some real good blow-ups of

[00:36:02 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2162s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2162s)

well you have some real good blow-ups of the scene here of the assassination scene are those from these appreader films are they from other sources that's these two photographs right here the first when I show you this was taken by again an amateur photographer in Dealey Plaza this first one was taken almost the instant of the first shot here you can see the president right over this patrolman's shoulder and if you look right up here in the little concrete wall you can see Abraham Zapruder and his secretary old pruder filmed his famous motion picture so it's a good clear view and there you can get a good idea of the perspective of a man that distance from the president this photograph is very important because of right down at the end of this little old white wall there is a man standing now even the new committee had to admit that this was a

man standing behind the wall and that there is a long object sticking upward out of his hand and a good possibility that it was a rifle that was before the shot just was purchased at the time of the first shots I'd like to add this for the benefit they're watching this on their TVs I personally didn't know whether to believe this particular part of it or not until you see the photos close up the photos close up definitely show a man standing at the end of the wall well even with their image enhancement and their sophisticated techniques they have had to admit and on a on a photograph immediately following that taken by the same photographer you can see very quickly but at the end of the wall there's no longer a man there and this was taken right after a win six seconds seconds now even that wouldn't be conclusive except more than fifty of the Dealey Plaza eyewitnesses said that shots were fired from this position that day we've either got affidavits or the Warren Commission himself at 47 another

[00:38:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2280s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2280s)

Warren Commission himself at 47 another record but we've managed to find 10 or 15 others that they didn't find we said the shots seven men saw a puff of smoke or flash' black one lady who was standing across the street in in this area right in here from this position said she saw a man in an overcoat and in a hat run from that area quickly after the shots were fired the policeman jumped off of their motorcycles and ran to this area all of the people the witnesses ran to this area looking for you can it hide this area that four men encountered men with the Secret Service identification which later on the Warren Commission even had to admit that there were no Secret Service agents in Dealey Plaza after the shots were fired right now you can clearly see from the photographs that most of the eyewitnesses are looking at the grassy knoll area and this is right after the president has been shot they're not looking at the president they're looking at the grassy knoll area as opposed to the School Book Depository building right and I might point out - this is William e Newman and his wife and two children mr. Newman told the Warren Commission and told authorities that day he was a Korean War veteran by the way and he said I hit the deck the shots were coming right over my head yes alarm Commission ignored either ignore them or do or never considered everything they had to ignore it but they couldn't explain away they ignored but they couldn't ignore and explain away they destroyed or suppressed let's look at another piece of evidence that they they ignored in the bullet this is the same book that supposedly went through John F Kennedy the seat after making its miraculous 90-degree turns it also went through John Connally and came out through his wrists and into his thigh was it or his phone that's correct this has been termed a famous miracle bullet this is a copper clad ledcor bullet this one is the one that the Warren Commission said went through President Kennedy from the back exited

[00:40:01 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2401s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2401s)

President Kennedy from the back exited his throat I went from there and because of the Supriya Pham we can tell when John got John Connally was wounded so the bullet had to pause about a second and a half to three seconds depending on when you want to say he was hit he was definitely not at the same time that's our smart board so we've got a delay plus it has to make a right turn downward and then a left turn to enter the governor just below the right shoulder blade it goes through his chest blasts out for each of his fifth rib Exodus his chest goes through his right wrist blasts out the main bone of his right wrist Exodus exits again and penetrates his left fire where it works itself Frey wipes itself off of any blood and tissue who crawls over onto another stretcher totally independent of either of the two victims that day and becomes the link to Oz was mannlicher-carcano rifle maybe maybe this ball came from outer space right we have some pictures of bullets in your book don't you that we can use for a comparison yeah to the Wonder border lose oblivion both required through a a cadaver and also in a goat okay this is the bullet that I just showed you this is another photograph of it this is a bullet of the same caliber faint fired from the same rifle and fired into the wrist only of a cadaver and you could see the mutilated point this other is one bullet it came into two pieces it was fired through the rib of a goat and so you can see what actually happens to this type of bullet when it comes in contact with a human being this is a single most damning piece of evidence is it not that's right this will not go away this will not get buried you can't you can't you know snuff it out like they've done with so many

people involved with this thing in fact the Warren Commission council said that to say that governor Connally and John Kennedy were not hit by the same bullet this miracle bullet this anonymous was saying that there was another assassin firing that day and

[00:42:01 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2521s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2521s)

another assassin firing that day and that's my contention the overwhelming evidence is that there were more than one rifleman in Daley Plaza that day or some of the other pictures and evidence that you have well I like to talk about this gentleman right here because this information only came out with a CIA release of their Kennedy material about two years ago under Freedom of Information a document from the CIA came out about a man by the name of John sweater a Frenchman a member of the OAS the OAS by the way is the secret organization that tried 28 times to assassinate a French premier Charles de Gaulle in the late 50s and early 60s mr. sweat rahat two aliases Michael ro ro UX and Michael Hertz mr. Switzer was a soldier of fortune an assassin a man who spoke French of course eloquently he spoke English with no accent at all vanished with no accent at all in other words he was a linguist this CIA document says mr. sweatshirt was in Fort Worth on the morning of November 22nd 1963 this is the time that the president was speaking at the at the Fort Worth Chamber of Commerce banquet he was in Dallas the time of the assassination and the document says he was blown out of this country on orders from people high in this government in the United States of America we talked to the FBI agent who originally got onto mr. sweat row and when he was in Houston and this FBI agent said that mr. sweat shrah either knew who killed Kennedy or he himself had killed him and yet these documents

[00:44:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2640s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2640s)

had killed him and yet these documents were classified for 14 years it was only in recently under Freedom of Information I have presently a Freedom of Information suit with the Central Intelligence Agency as well as the FBI who have now had to admit that this man exists and the documents pertaining to them are in their files and yet it will probably be another year before I'm able to receive those documents if I get them at all with the Freedom of Information accident very important has it not because listening to a Mark Lane speech it definitely proves now that Oswald was working with the FBI that ruby was an FBI agent and that each of them had some connection with the CIA and that ruby also had the connection right I doubt very seriously if we'll have this Freedom of Information Act very much longer the talk isn't now that the freedom of information is allowing organized crime to get information and that they're combining and are accumulating information from this Freedom of Information Act therefore we need to shut it off so I look for that in the very near future probably before I get my documents on mr. Switzer oh by the way it's too lengthy to go into probably but mr. sweater also has a strange connection to to mr. Ruby oddly enough all through another man who died in 1973 I believe in Texas a gunrunner that was close friends and who Ruby very definitely wanted to conceal the information about from the Warren Commission strange okay what are some other things you have here well I think we'd be home about all of them their photographs and so forth but tell us about now you appeared with the committee before they actually got started were you a consultant or there no help set it up and that's a long story at one time the committee I believe was really in truly seeking to know the truth particularly the staff that's right and in fact immediately

[00:46:00 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2760s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2760s)

that's right and in fact immediately after they were funded two of the investigators came to the dallas-fort Worth area contacted me and spent four hours with me on various aspects of the case this was back when Richard's Christmas was Richard and we had a first chance in history of really breaking the thing wide open but I think even then that the powers that be saw the handwriting on the wall and began to cause division within the committee within the staff within the congressmen who were participating in it Henry Gonzalez right and got Henry Gonzalez and Richard Sprague butting heads and so unfortunately we had the resignation of Gonzalez and then the resignation of Sprague and now we have chief counsel G Robert Blakey a professor who is now I believe the most active participant in the new cover-up or the new

whitewash that's being applied to the case and I predict that the conclusions will be just from what we've seen in fact they begin to write the report in March of this year so that ought to tell you something before they had any public hearings no public testimony and they already had the report drafted so they're going to say I'm sure that Lee Harvey Oswald fired all the shots that he did it from the sixth floor window that the wounds and ballistics were correct as the Warren Commission stated and that the FBI did do a poor job in investigating and that the CIA didn't do a very good job and the Warren Commission was flawed because of the information that was given them and and this sort of thing but basically the conclusion will be the same let's go back and talk about motive for permanent Geary because in any murder case the detective always looks for a motive to me it seems that the motive was clearly there for the CIA to be implicated in this since Robert Kennedy I mean Jack Kennedy had not only put the CIA down but he had also tried to dismantle the overt covert operation group he had

[00:48:02 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2882s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=2882s)

overt covert operation group he had fired Allen Dulles as the head of the CIA few months prior to his being assassinated Robert Kennedy had been putting known members of the mafia in jail left and right from Gioconda to Roselli uh and he was he was stepping up the whole organized crime strike force attack on the Mafia would you care to comment anything about the motives for these various agencies and groups and then ascend against a central point of this whole thing is Cuba Cuba you look at it off of that is the CIA which had formed a task force against Cuba they were attempting to assassinate Fidel Castro they had hired organized crime members to actually hit Castro right and on organized crime had been run out of Cuba right Lansky in has his organization and from what we've been told but they had a lot of money buried on the island the motives of course was to recapture some of the money and plus their gambling casino base that's correct so you have that kind of a central theme it's Cuba and for that reason a lot of people think that that Castro because of the attempts on his life that he retaliated by killing Kennedy that's not so at all mr. Kennedy was uh was actively investigating organized crime joseph filippi at that time was squealing his loans out before a congressional committee and this embarrassed the FBI to know in because of throughout the existence of the FBI prior to this in Jagger hoovered denied the existence of the Mafia is correct it's come out since then that he used to MIT meet regularly with Frank Costello right no never the organ well he denied the existence of it when he finally had to admit it he gave it a name called Cosa Nostra Roy he wouldn't call it mafia his didn't some of his underlings found this name to help him save face if he just discovered this all of a sudden next time well there's another aspect of the Kennedy thing too in relation to Castro and that he was in Kennedy was carrying on cc-could indirect negotiations to try

[00:50:01 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=3001s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=3001s)

on cc-could indirect negotiations to try to normalize relationship with Castro to and was wanting to dismantle the CIA what about the Nixon connection and and the Watergate plumbers who were also in Dallas at that time if okay the CIA was funding at that time a human exile group called the Cuban revolutionary council this is another one of the strange ties because the man who who was head of that group for the government was he Howard hunt and of course Nixon at that time was vice president this was in the late fifties Eisenhower was president Nixon was vice president he was in charge and hit pretty Howard hunt this cuban revolutionary council had its offices at 5:44 camp Street in New Orleans Louisiana it's at 5:44 Camp Street that Lee Harvey Oswald this is the address that he put on his fair play for Cuba leaflets that he was passing out in New Orleans in the summer months prior to the president's death in Dallas so you've got E Howard hunt ty to the Cuban revolutionary council you've got Lee Harvey Oswald tied to it you've got Richard Nixon in charge of it and then later on you have Watergate with Richard Nixon at the head by the way we've got a similar situation there we were told it was one little nut in Kennedy's case and then later on we've got two lone nuts with with jack ruby originally in the watergate episode we were told that we had five lone nuts broken into it then that five turned out to be seven and then seven later turned out to be all the way up to the administration actually right where the head nut was so we're we're not unacquainted with the lone nut theory

and so that's the Watergate connection and in my opinion mr. Nixon got into a position that the powers-that-be did not like and they couldn't afford to blow another one's brains out so character assassination was the next

[00:52:02 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=3122s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=3122s)

so character assassination was the next best thing and I think that the whole thing was plotted and carried out to get us a president that we didn't elect the vice president that we did not elect and unfortunately it's interesting to note that Nixon was home free until Alexander Butterfield who was the CIA agent walked in one day and just simply volunteered that he had the president United States on tape tape saying a lot of interesting things that's correct yeah what about the new information which the committee supposedly took a look at the congressional committee regarding the acoustics we are-- both the reconstruction of the whole assassination for acoustic purposes seeing how they would match up with the microphone being left on during and recording during the by a policeman during that was a great piece of evidence properly properly utilized and a lot of people don't know this and so I give you the background on it during the time of the assassination a Dallas motorcycle patrolman at the exact moment of the shots and for about five minutes thereafter depressed his mic button while in Dealey Plaza where we had always assumed simply that that was blocking off communications from the area for the for the authorities and that that's all there was to it but a man by the name of Gary Mac is a program director for z97 FM and in Fort Worth said look if that man was in Daley Plaza and he had his microphone open there's a good possibility that the shots were recorded even though they would be of a low nature and would have to have sophisticated techniques in which to bring them out it's a good possibility so he began analyzation with with a very sophisticated electronic equipment and was able to pull out in his opinion seven shots seven shots and so he wrote a story on it and of course if this got

[00:54:01 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=3241s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=3241s)

a story on it and of course if this got to the new committee so they said well we better look into this too so they had affirm that in fact the same firm that analyzed the Nixon Watergate Gap tape this firm said that definitely they could hear four shots rough it was too many you know we're satisfied with four because that proves a conspiracy and so they rent them retain this firm to perform sophisticated tests in Dealey Plaza and that's was much publicized they actually fired shots again in in Dealey Plaza Dallas I went there and witnessed this and definitely you can tell the difference between a shot fired from the grassy knoll in one fired from the sixth floor window because they fired from both of these positions and this farm again took these by placing the microphones in different positions and firing shots from the different locations and and by their sophisticated electronic equipment were able to say that there were four shots again from this recording and they said one of them did come from the grassy knoll now the committee is going to have have to and will completely disregard this particular evidence either disregard her to try to find some excruciating way they'll they'll try to take the other evidence probably and manipulate it and say well we've got this over there evidence and it's the preponderance of the evidence says that this is not so well we have about 45 seconds can you give us some ation of what your opinion is of this whole of their but I think it's very important that the people of Texas convene a grand jury and an inquiry here it needs to be taken out of the political arena which is what it is in Washington I said years and years ago that the Congress is not the place for an investigation into the death of the president and at the only place the president's death was not a federal crime in 1963 it was a murder under

[00:56:03 \(https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=3363s\)](https://www.youtube.com/watch?v=FbR_cEZ0AaU&t=3363s)

crime in 1963 it was a murder under state statutes and it ought to be treated as such because there's no statute of limitations on murder and if they would do it get 12 tried-and-true men here in Texas are people here in Texas put them in a in a jury box and bring the evidence to them I believe they would reach the conclusions that would bring to justice the criminals who performed this act November 22nd 1963 that concludes alternative views we're glad you could join us alternative views is a presentation of the alternative
